HIGH PERFORMANCE

FEATURED CONTENT

New Holland uses only the best suppliers to ensure your machine is fitted with the best equipment and remains at peak performance. You can find lots more information about each of our partners in this magazine along with some special offers bespoke to New Holland customers!

For more information about any of our partners and their products, contact your local New Holland dealer.

04 TRELLEBORG

Traction solution and a full tyre range from our partners at Trelleborg.

05 GRANIT

A range of tools & lighting solutions from our partners at Granit.

07 PETRONAS

A range of oils & lubricants from our partners at Petronas.

08 PLATINUM

A range of batteries from our partners at Platinum.

10 GREENCHEM

Adblue solutions from our partners at Greenchem.

11 LYNX

A range of excellent agricultural accessories from our partners at Lynx.

12 NEW HOLLAND CLOTHING

A range of essential PPE and New Holland clothing.

TIRED OF HAVING NO GRIP? CHOOSE THE BEST TRACTION SOLUTIONS

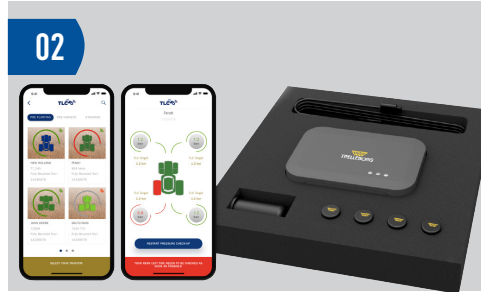

01 TM1000 PROGRESSIVE TRACTION

Low performance tyres are simply unacceptable in such demanding working conditions, so don't settle for less.

Trelleborg's TM1000 ProgressiveTraction benefits from VF construction designed to increase efficiency in every situation you might encounter. This makes it, the perfect addition to your machinery to ensure you maximise your productivity and safety on the road, in the field and around the farm.

In the field the TM1000 ProgressiveTraction® ensures less soil compaction through its wider footprint area, while on the road, it reduces the number of trips due to its very high load capacity. This tyre has been designed with advanced technology for advanced farming including enhanced self-cleaning due to its extra lugs. The main lugs of the tire have a wider base and a double edge to maximise grip and reduce vibration allowing for decreased fuel consumption.

02 TLC PLUS

In addition to having the right tyres, it is essential to have the right pressure to manage heavy loads, maximise grip and minimise fuel consumption.

For this reason, Trelleborg have developed the TLC Plus which is an advanced, sensor-based check-up system, which measures the tire pressure.

The TLC Plus kit comes equipped with 4 sensors which are easy to install, high temperature proof and last up to 5 years. The kit also comes with a Gateway which offers low power consumption data transmission with a reliable frequency of 434Mhz.

Put simply, the TLC Plus provides the user with live tyre pressure data allowing them to act quickly to maintain the correct tyre pressure.

Trelleborg's TM tyres range starts at £200. To learn more about Trelleborg's products or place an order, contact your nearest New Holland dealer

£55.00

GRANIT BLACK EDITION BATTERY CHARGER

5850010113 - Suitable for all common starter & supply batteries. 3-30 (Ah) Battery Capacity Dimensions 149 x 71 x 32mm. Multi-stage charging process (5 or 7 Stages). Including analysis, desulfation, reconditioning and charge maintenance.

£130.00

GRANIT BLACK EDITION ON-BOARD TOOLSET

7302222 - Double open-ended spanners, 8x9, 10x11, 12x13, 17x19mm. Double ring ratchet spanners, 10x19, 13x17mm. Water pump pliers, 180mm. 10 piece hexagon key set. Screwdrivers PH1, PH2, Slotted: 3, 4, 5.5mm. Aluminium telescopic magnetic holder. Aluminium telescopic mirror. Feeler gauge, 20 blades, 0.05, 1mm.

£42.00

GRANIT BLACK EDITION BATTERY-POWERED LED

7304500 - Main work light with dimmable high-performance COB LED 90-700 lumens. Additional spotlight (120 lumen) for precise illumination. Flexible - can be rotated 180° horizontally and vertically. With magnetic base and fold-out hook. Rubber-coated housing. Li-ion battery 3.7V/2600 mAh with charge level indicator.

£147.00

GRANIT LED WARNING LIGHT

2070010010 - Single sided, pointing Left & Right. Dimensions 423 x 423 mm. Main Cable Length 6.5m / Connection Cable Length 8.0m. Lights in LED. Warning signs supplied in Galvanised Sheet steel. Includes integrated indicator failure monitoring.

£95.00

GRANIT LED WORK LIGHT / LIGHT BAR

7070010203 - 12/24v Nominal / 10-30 Range. 60 x LED's Effective Luminous flux (lm) 11,664lm (theoretical 16,200lm). 865 x 90 x 79 mm / Aluminium housing with cooling fins & diffusing Lens. Aluminium Bracket with 842mm spacing. 2 pin open cable ends (red+/black-) / 2m cable. Power consumption 180w / mounting size 90mm.

£46.00

GRANIT LED ROTATING BEACON

7070010324 - 12/24v. 12 x LED's / Amber / Black housing. Dia 108mm x Height 150mm / Plastic Housing & Lens. Radio interference suppression according to EE R10. Mounting Pipe Socket & Connection Socket pipe. Rotating double/six-fold flash. Protection Class IP65.

START TO PREPARE. PREPARE TO START.

NEW HOLLAND PLATINUM BATTERIES

A battery is one of the most vital components of your machinery – so make sure you choose the right one.

Platinum Batteries are designed specifically for New Holland machinery to ensure your downtime is minimised and performance of your machinery is maximised.

Platinum batteries are OE Tier 1 Manufactured meaning they only work with the highest level of manufacturer who are continuously testing their products under rigorous conditions to ensure performance and longevity. Additionally, Platinum batteries have maintenance free options, removing the need for water top ups as the product self-filters.

CARE & MAINTENANCE

- A battery is a 'living product', once manufactured it begins to die. Do not store batteries in a discharged condition.
- Check for voltage once a month, refresh the product when this falls to 12.5v.
- Batteries should always be stored in a clean, cool, well ventilated, dry place and in an upright position.
- Batteries give off explosive gasses, do not smoke or have any other naked flame in the vicinity.
- Batteries are heavy, caution should be used when lifting.
- If acid is spilled onto any part of the body, cool with water and seek immediate medical attention.
- If a battery is damaged resulting in spillage of acid, neutralise with soda ash.
- Always charge with the recommended equipment in a well ventilated area
- Do not place tools or metal objects on the lid as a short circuit across the terminals could result in explosion.

ORDER YOUR PLATINUM BATTERY TODAY

In addition to agricultural uses, Platinum also offer a full product range for every utility including automotive, motorcycle and electric fence batteries. Platinum pride themselves on sustainability offering a Waste Battery Recycling scheme in which Platinum will collect as little as 1 battery and offer very competitive pricing in exchange.

Platinum offer National Coverage to the whole of the UK and Northern Ireland and provide delivery to your nearest dealer at least 3 times a week with no minimum order quantity or carriage charges.

To order the right battery for your machinery today, contact your nearest dealer.

INTELLIGENT TRAILER BRAKING SYSTEMS ENSURE YOUR SAFETY WHEN TOWING HEAVY LOADS

ENJOY ALL THE BENEFITS OF SAFER DRIVING AND CO-ORDINATED BRAKING

- Automatically controls the pneumatic brakes of trailed equipment
- Prevents the tractor from being pushed by the trailer and avoids the risk of jack-knifing
- Aligns tractor-trailer deceleration rates for improved stability
- No modifications are required to the trailed equipment

PROTECT YOURSELF, YOUR EQUIPMENT AND YOUR PRODUCTIVITY AGAINST ANY POSSIBLE RISK

DON'T JUST PROTECT YOUR MACHINERY. PROTECT THE ENVIRONMENT.

01

JERRY CANS (10L OR 20L)

AdBlue jerry cans are the perfect way to equip yourself with an emergency supply of AdBlue. We recommend jerry cans for customers buying AdBlue for cars, jeeps and small diesel vehicles. These small jerry cans are an essential for the boot of any diesel car equipped with an SCR system.

02

DRUM 200L

GreenChem AdBlue® drums are excellent if you want to have maximum flexibility for refilling AdBlue® at your premises or if you have a small yearly usage. An AdBlue® drum can be fitted on a trolley which makes it easily movable within your workshop or yard, without having to move the machines that need to be filled.

03

IBC (1,000L)

GreenChem offers special AdBlue IBC with the possibility to integrate a manual or electrical pump. To make sure you get the best experience from our IBCs systems, they can be equipped by gravity feed kit, bottom valve, CDS system and breathing system on the top. Combined by a manual or electrical pump, you get a great solution for 1000l of Adblue.

04

SMART LITE RETAIL

GreenChem offers a smart solution designed for AdBlue storage and dispensing equipment to a large fleet of vehicles. The small footprint design makes it possible to install the system in the smallest of places: directly on a service station island with limited space or any other location where AdBlue can be offered. We can offer an "all-inclusive" solution with no start-up fees or capital expenditure and as always, with a fully integrated telemetry system for automatic deliveries so you never have to worry about your level of AdBlue.

For accurate AdBlue pricing, contact your nearest
New Holland Dealer.

BE PREPARED. BE PROTECTED. BE PRODUCTIVE.

01

VERRIDE PROTECTION

Your safety is of paramount importance, whether in the field, on the road or in the farmyard. Therefore, Override Protection is essential to ensure the safety of our valued customers as it lifts the impact of any collision your tractor could be involved in. Lynx Engineering's Override Protection implements come fitted with LED daytime running lights, bumper pillars, integrated tow hooks and are available in a range of colours. Additionally, you can make the most of your Override Protection by adding a 'Multibox' with a storage facility or a Module with stackable weights.

02

RUBBER TRACK SYSTEMS

Relieve the soil, that is what it's all about! Track systems produce far lower soil pressure, so there is no damage to underlying soil layers. Year-round usage of track systems increases root development and leads to a yield increase of up to 15% in just a few years. Lynx Engineering have developed track systems that are rapidly interchangeable, available with various track widths and intermediate axles to suit your desires. Rubber tracks are an excellent investment for farmers wanting to increase their yield and support a more sustainable farming future.

03

FRONT LINKAGE SYSTEM & PTO SYSTEM

With a lifting range of up to 90cm, Electronic Frontlift Control (EFC) and Easy Float capabilities – the Lynx Engineering front linkage is not just any front linkage. This front linkage comes available with various PTO systems that suit operational duties and has maximum ground clearance for efficient use of implements. These advantages make the front linkage and PTO system an indispensable for the day-to-day management of any agricultural business.

04

FRONT WEIGHTS

Front weights are essential on any tractor but why not choose a front weight that is suited to your needs. Lynx Engineering provide various models of front weights with built in toolboxes, available in different colours and in a compact, modern design that suits your tractor. Lynx also offer an Implement carrier for steel block weights and a weight carrier, ideal for smaller front weight requirements.

PRICES FOR LYNX ENGINEERING'S RANGE OF FRONT WEIGHTS START FROM €1040. FOR MORE INFORMATION ABOUT LYNX ENGINEERING'S PRODUCTS, CONTACT YOUR NEAREST NEW HOLLAND DEALER WHO WILL BE ABLE TO ADVISE ON THE CORRECT PRODUCT FOR YOUR NEEDS.

DON'T JUST PROTECT YOUR MACHINERY. PROTECT YOURSELF.

ICE FELL HOODED JACKET NAVY NHA1001X **£57.00**
